

EcoMax

Envision A Bright, Green World!

Waterbased Ink For Outdoor Printing!
Uses Low-Cost Uncoated Paper!
Lower Printing Costs than Eco/Solvent or Latex!

We bring to you a line of Eco-Friendly printers to match today's push for a safer, friendlier environment. Print superior quality images both indoors or outdoors with cost effective, environmental consideration.

No Hazardous Waste ● No Fumes ● No Daily Maintenance

EcoMax

Introducing the EcoMax line of printers. We continue to innovate and refine the overall printing experience. It's easy to use. For **simply green** printing without compromising quality. Go to the max with EcoMax! The products you are about to experience were crafted to combine the delicate balance of technical expertise, artistic capability, and environmental consideration all while keeping in mind efficiency and ease of the user with superior quality images allowing you to print your vision without compromise.

SEPIAX Revolutionary Waterbased Ink... AND, YES, YOU CAN TAKE IT OUTDOORS!

SEPIAX Ink prints on virtually any substrate whether coated or uncoated, indoors or outdoors – truly the first “direct-to-anything” ink. Even more astounding, the ink is water-based, environmentally friendly and can last up to three years outdoors without any lamination.

- Eco-friendly, odorless and non-flammable
- No hazardous monomers
- Exceptional color pigment and resin properties
- Adhesion and durability similar to UV curable ink
- Ink usage 30%-50% less means lower operating costs
- Clog-free formula enhances print head longevity
- Outdoor durability of up to three years or five with lamination
- Compatible with all Epson Piezo print heads

Digital Factory

The First Print & Cut RIP Software Designed Specifically for the Signmaker Specialist

Unlike the multitude of RIP software packages that were solely designed for wide format printing, Digital Factory RIP software includes features that support seamless print and cut workflows. Not only does Digital Factory provide complete job management and preparation tools, vibrant color, unmatched RIP speeds for hundreds of printers, post-print cutting support on hundreds of separate cutters or hybrid print/cut devices... It combines all of these features in an interface that is quick and easy to use.

Applications

Outdoor or indoor graphic signs, outdoor banners, flags, POP and POS displays, car wraps/vehicle displays and decals, photo reproduction, custom wall displays and murals, trade show graphics, window graphics, real estate signs, campaign signs, yard signs, stickers, decals, high quality and high precision printing and contour cutting of posters, back-lit signage, photo-realistic prints, decals, bumper stickers, vinyl lettering, adhesive back vinyl, office signs, CAD or technical documents and much more.
